Microservices

## Certifications

IELTS  
Red Hat Certified Specialist in SELinux Policy Administration

# Abdelrahman Farag

Spring Boot Developer | Angular Trainee @ITI | Full Stack Developer | Angular | Competitive Programmer  
Cairo, Cairo, Egypt

## Summary

i am a Backend Software Engineer specializing in Java and Spring Boot, with hands-on experience building scalable backend systems and full-stack applications. I have practical experience developing REST APIs, implementing authentication and authorization using JWT, designing role-based access control, and building booking and notification systems. I focus on clean architecture, modular design, and writing maintainable, production-ready code. I completed a Frontend Internship at the Information Technology Institute (ITI), where I strengthened my knowledge of modern frontend development and built responsive, well-structured user interfaces. This experience enhanced my understanding of full-stack integration and frontend-backend communication. Technically, I have experience with: Spring Boot & RESTful APIs, Microservices architecture, Docker & containerization, Apache Kafka (event-driven systems), Angular, PostgreSQL & relational database design. I am passionate about understanding how distributed systems scale, how services communicate efficiently, and how to design reliable backend solutions for real-world scenarios. Open to backend or full-stack opportunities where I can contribute, learn, and build impactful systems.
